

ctu.cz interconnect rates

The maximum wholesale interconnection termination rates in the Czech Republic, regulated by the Czech Telecommunication Office ([Český telekomunikační úřad / ČTÚ](#)) and compliant with EU-wide caps, are currently set at:

- **Mobile Termination Rate (MTR):** 0.36 euro cents per minute.
- **Fixed Termination Rate (FTR):** 0.07 euro cents per minute.

Both rates are charged on a per-second basis starting from the first second.

The ČTÚ oversees and sets these rates in accordance with the European Commission Delegated Regulation 2021/654 to ensure a single, consistent maximum termination rate across all European Union member states. The specific interconnection agreements and underlying wholesale Reference Interconnection Offers (RIOs) vary by operator and are made publicly available. +2

For example, the primary incumbent infrastructure provider, CETIN, along with mobile network operators T-Mobile and Vodafone, define their specific interconnection obligations and price controls within these CTU-mandated boundaries.

For official ČTÚ documentation regarding market analyses, price controls, and interconnection disputes, consult the [CTU Public Consultations Site](#). To compare retail telecommunications offers that result from these wholesale rates, use the [CTU Price and Quality Comparison Tool](#).
